

Amp Agronomy™

TOOLS FOR GROWTH

Catalyst Technology

Amp Agronomy's proprietary process is a nutritional line that is the most efficient nutrient delivery system available on the market today.

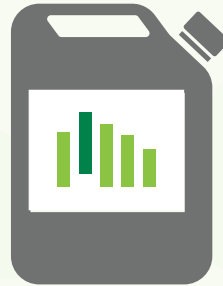

Expert Staff

Our sales staff are more than sales people. They are knowledgeable experts who can help you increase yields, reduce costs, and grow profit per acre.

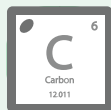

Soil Sample Test

By running both a chemical and paste extraction soil test, our agronomist can identify key areas of deficiencies.

Product Recommendations

Based on the needs of the soil and the crop, a custom mix of high quality products are recommended.

Carbon

Carbon is key to all life. Our carbon unlocks the potential of microbes and promotes organic growth of microbe populations.

Earth Friendly

Amp Agronomy products enable producers and managers to apply fewer overall inputs into their crops and to more efficiently mix, spray and manage these reduced inputs - with greater results.

Foliar Efficiency

Our nutritional lines use foliar feeding processes that increase response, minimize leaching, and increase plant yields.
