

Root Driver™

Root Driver protects the phosphorus with carbon complexing, keeping the phosphorus free from soil tie-up and available to your plants all season.

Benefits

- ✔ Highest availability phosphorus fertilizer
- ✔ Ultra low application rates, only one to three qts/acre
- ✔ Supplies available nutrients to your crop
- ✔ Promotes quick, uniform emergence
- ✔ Seed safe at recommended rates
- ✔ Clean, easy handling solution
- ✔ Will not corrode application equipment
- ✔ Low impurities
- ✔ Low salt

Overwhelming research proves that plants require an available supply of phosphorus in the beginning stages of life to reach their growth potential.

Most of inadequately protected phosphorus is wasted, forming solids in the soil and becoming unavailable to plants as it reacts with calcium, aluminum, iron and other ions in the soil. This leads to nutrient deficiency, causing a lack of full plant growth.

Root Driver protects the phosphorus, giving your plant the nutrients it needs, when it needs it.
